

MPGU Public Website Digest

A thorough English-language crawl summary of the Moscow Pedagogical State University website

This PDF compiles the public English pages of the MPGU website into one structured digest. It focuses on the site homepage and the major internal sections that are exposed in the main menu: About MPGU, Admissions, Education, Research, International, and Contacts. The digest also includes the step-by-step admission flow for foreign citizens, the structure of institutes and faculties, an overview of bachelor, master, and PhD study levels, selected English and German programs, and high-level science and international cooperation information.

Source site	https://en.mpgu.su/homempgu/
Scope	Public English pages only
Focus	Admissions, structure, education, research, international profile, contacts
Format	Single PDF digest for quick review and sharing

Prepared for offline review and RAG data collection planning.

1. What the MPGU website exposes at a glance

The homepage presents MPGU as an official university website with a clear multi-level menu. The main navigation exposes the core public areas: About MPGU, Admissions, Education, Research, and International. The homepage also highlights recent news, contact information, and partner links, which makes it a useful entry point for a site crawl.

- About MPGU: history, rector's greetings, official documents, structure, development strategy, photo gallery, career and alumni, contacts.
- Admissions: attention notices, admission for foreign citizens, dormitories, open doors day, academic FAQ.
- Education: bachelor, master, PhD, English and German programs, institutes and faculties, Russian language training.
- Research: science and research complex, postgraduate studies, academic journals, RIAS.
- International: relations office, partners, mobility, buddy club, Russia-China center.

The homepage also shows current news stories, including items for international students and international cooperation. The contact block on the homepage publishes admission and general inquiry phone numbers, the international relations office address, and the main university address in Moscow.

2. About MPGU and institutional structure

The site structure page shows that MPGU is organized around a broad institutional model. Its major structural groups include University Management and Boards, Administration and University Branches, Institutes and Faculties, Center for Student Disability Services, University Life, and the Psychological Assistance Center. That structure matters for RAG because many student questions map directly to one of those institutional units.

Main institutes and faculties exposed on the site

- Institute of Fine Arts
- Institute of History and Politics
- Institute of Physical Education, Sport and Health
- Institute of Biology and Chemistry
- Institute of Childhood
- Institute of Physics, Technology, and Informational Systems
- Institute of Foreign Languages
- Institute of Philology
- Institute of Mathematics and Informatics
- Faculty of Geography
- Institute of Pedagogy and Psychology
- Institute of Journalism, Communications and Media Education
- Institute of Social Studies and Humanities
- Faculty of Pre-School Pedagogy and Psychology
- Institute of International Education
- Institute of Digital Education Development

The institutional list is important because the education pages and program pages are organized by these units. For a knowledge base, these names become high-value retrieval labels for questions about where a program or

department belongs.

3. Admissions for foreign citizens

The admissions page for foreign citizens is one of the most useful pages on the site. It gives a practical step-by-step path for international applicants and includes the official e-mail used to start document submission. The page also links to the personal-account instructions and the educational-program list for foreign citizens and stateless persons.

Admission flow summarized

- Step 1: choose an educational program from the official list.
- Step 2: review the tuition cost for the selected level of study.
- Step 3: prepare scans of the required documents and upload them to the applicant personal account.
- Step 4: send additional materials if the selected program requires them (for example for music, art, or postgraduate study).
- Step 5: wait for official acceptance and then follow the financing route (Rossotrudnichestvo or contract study).

Core documents named on the page

- Passport page with photo
- Notarized Russian translation of the passport
- Education document with legalization or apostille, plus notarized Russian translation
- Photo 3x4

The page also states that applicants under contract should take entrance tests, sign a contract after successful results, pay tuition, and then contact the faculty to begin studies. For foreign-student questions, the page prominently uses the address foreign@mpgu.su and provides contact details for faculty curators.

4. Education at MPGU

The education section is divided into bachelor, master, PhD, and the English and German program cluster. This gives the site a clear academic hierarchy, which is very useful for a structured university knowledge base.

Bachelor level

The bachelor page explains that the bachelor degree is the first step of higher education. It lasts four years in the standard case, and the page lists study calendars, degree outcomes, and progression options to master's study, short programs, or Russian language proficiency courses.

- Typical duration: 4 years
- Winter semester and summer semester dates are published on the page
- Graduates receive a bachelor diploma
- Students can continue to master's study or short-term programs

The bachelor catalog is broad and is grouped by institutes and faculties. The visible examples on the page include geography, biology, childhood and defectology, journalism, arts, design, music, and other pedagogical tracks.

Master level

The master page explains that the master degree is the second step of higher education. The standard duration is two years, and graduates can continue to PhD study, short educational programs, or Russian language training.

- Typical duration: 2 years
- Programs are grouped by institute or faculty

- Several programs use a complex exam and Russian language examination
- Tuition values are published per program per year

The page shows examples such as ecology and nature management, international tourism, geography education technologies, biological and environmental education, and special (defectological) education.

PhD level

The PhD page explains that doctoral study is the third level of higher education in Russia. It emphasizes research, thesis work, and oral examination. The page states that completion normally takes three to four years depending on the study mode and program.

- Typical duration: 3 to 4 years
- Research thesis is the central requirement
- The page lists a wide range of scientific areas
- Examples include geography, biology, chemistry, law, linguistics, pedagogy, philology, psychology, physics and mathematics, political sciences, sociology, and IT technologies

5. English and German taught programs

MPGU has a dedicated page for bilingual and foreign-language programs. This page is particularly important for international applicants because it brings together the English and German options in one place.

- English and International Communication (bachelor, in English)
- Modern Technologies in Teaching English (master, in English)
- Deutsch als Fremdsprache und Neue Medien (master, in German)
- Fundamental Physics (bachelor, in English)
- Person-oriented Consulting (master, in English)
- Regional Studies of Russia (bachelor, in English)

The page also points applicants back to the International Relations Office and program managers for program-specific details.

6. Science and research

The science and research page presents MPGU as a research-active university with strong traditions in academic and scientific work. It states that the university organizes scientific conferences, seminars, workshops, and publication support. The page also highlights MPGU's participation in research projects connected to teaching methods, contemporary mentalities, economics, globalization, and IT in education.

- MPGU supports researchers and organizes special projects, conferences, and seminars.
- The site states that 56 doctoral programs are offered in 17 scientific areas.
- The visible areas include biology, chemistry, culture and art, economics, geography, history, law, linguistics, pedagogy, philology, psychology, physics and mathematics, political sciences, sociology, and IT technologies.
- The page also mentions prominent scientists and Nobel laureate connections.

7. International profile

The international page is central for any foreign-student knowledge base. It states that MPGU is focused on academic and scientific cooperation worldwide, welcomes international students and teachers, and supports students and staff who want to study or teach abroad.

- More than 2000 foreign students study at MPGU.
- MPGU works with more than 90 foreign organizations and universities.
- The university collaborates in student exchange, academic staff exchange, scientific projects, conferences, and seminars.
- The site emphasizes mobility programs and internships, especially in preschool and school education.

8. Contacts and support

The contacts page gives the address and communication channels of the International Relations Office and the International Students Department. It also gives the Passport and Visa Department contacts and a press contact, which are all high-value points for student support and admissions workflows.

- International Relations Office reception and general questions contact are listed on the page.
- Foreign@mpgu.su is again shown as the main admissions and educational-process e-mail.
- The Passport and Visa Department has its own office and contact details.
- The press contact is also listed for media inquiries.

9. Why this crawl matters for your chatbot

This crawl gives you a high-value public knowledge base for retrieval. The strongest question types now have a clear source on the site: admissions for foreign citizens, institute and faculty structure, degree-level program lists, English/German programs, research overview, international support, and contact routes. That means the next step in your chatbot project is not more keyword rules; it is cleaning, chunking, embedding, and indexing these pages so the retriever can pull the correct source text before Groq writes the final answer.
